

**Stord One Commerce is a cloud-native software platform that lets you manage and automate your supply chain processes and elements, from inventory and orders to marketplaces and customers. Regardless of your underlying infrastructure or existing supply chain partners, now you can access all the insights you need in a single dashboard to intelligently orchestrate and optimize your logistics network.**

**WHO'S IT FOR**

B2B, B2C and Omnichannel brands rely on Stord One Commerce to support their order management, inventory management, inventory planning, system connectivity and business intelligence needs.

Select Stord One Commerce Customers

*"The biggest benefit of working with a partner like Stord is the technology and the insights that you gain. I haven't seen that with any other fulfillment partner...they're giving you **insights into really critical business information** when it comes to inventory, when it comes to planning, that we really didn't have before. The Stord One platform really **serves as the center source of truth** for our team."*

FOUNDER & CEO - HIGH GROWTH DTC BRAND

# The One Platform to Run Your Business

Stord One Commerce is a highly secure SaaS solution that brings the power of Cloud Supply Chain to your fingertips, providing you, for the first time, a **single source of truth across your entire network of systems, facilities and partners**. Stord One Commerce does this via four fully-featured software components:

## Visibility

Gain unparalleled visibility into your orders, inventory, and shipments supported with extensive operational metrics and dashboards

## Orchestration

Orchestrate your entire logistics operations, across all your locations, from order management to proactive visibility 'beyond the warehouse'

## Optimization

Make smarter business decisions by optimizing your inventory planning and business across multiple sales channels

## Connectivity

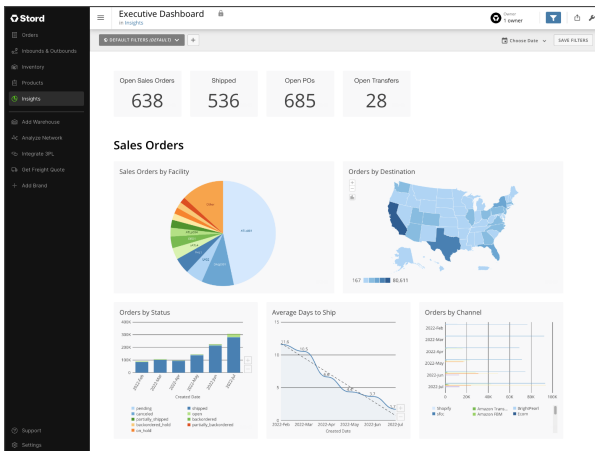

Easily connect to all your disparate systems from ERPs and warehouses to online marketplaces and retail partners

# Key Benefits

 <p>Manage a complex supply chain at scale from a single dashboard</p>	 <p>Eliminate siloed data and multiple system logins with aggregated, consolidated view</p>	 <p>Rapidly add new sales channels and inventory locations without IT headaches</p>	 <p>Track inventory levels across multiple warehouses and 3PLs</p>
 <p>Ship efficiently and cost-effectively from multiple warehouses</p>	 <p>Monitor inbound and outbound orders' entire lifecycles</p>	 <p>Control how orders are routed and inventory shortfalls are handled</p>	 <p>Track key performance metrics to proactively address operational issues and prevent customer problems</p>

## Visibility

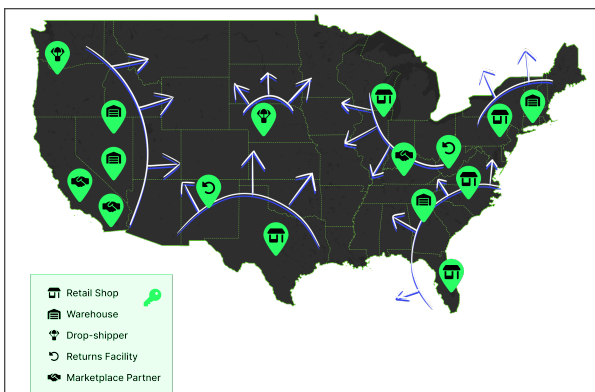

Gain unparalleled access to events as they happen throughout the full order lifecycle, across all sales channels with detailed insights into operations

VIEW ALL YOUR KPIS ACROSS ALL CHANNELS AND FACILITIES FROM ONE PLATFORM

## Optimization

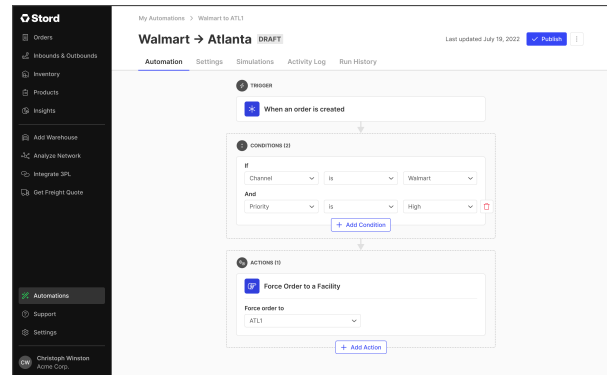

Maximize the ROI on investments (i.e., inventory) and optimize fulfillment across channels

OPTIMIZE FULFILLMENT ACROSS ALL YOUR CHANNELS THROUGH ONE PLATFORM

## Orchestration

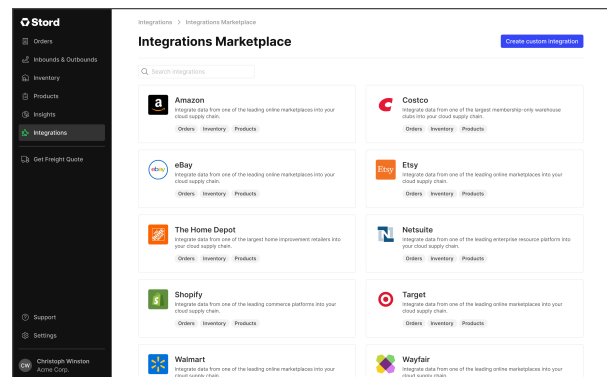

Take action on events throughout the full order lifecycle from incoming sales channels to fulfillment channels, while intelligently automating order routing across multiple locations, with analytics to manage performance both inside and beyond the warehouse

MANAGE ORDER ROUTING PREFERENCES

## Connectivity

Integrate seamlessly to every element of your logistics network, with over 100 standard integrations to the leading marketplaces, WMSs, ERPs and Retailers

EASILY CONNECT ONCE TO ALL YOUR MARKETPLACES, RETAIL PARTNERS, WAREHOUSES, FINANCIAL SYSTEMS AND MORE
